SKILLS

Core JAVA

Spring Boot

Microservices

Kafka (Basics)

GITHUB

Angular (Basics)

JIRA

ABS (A3K Architecture)

Databases worked with :- MySQL,

MongoDB

ACCOMPLISHMENTS

Navaratna Award (05/23) *Navaratna Award for New Joiners in Allianz Technologies*

Bravo Awards (2023, 2024) *Bravo Awards for exceptional work ethics in Allianz Technologies*

ER&D Excellence Awards (08/22) *ER&D Excellence Awards : Q2 FY'2022 Winners (Wipro Technologies)*

Joy of Computing using Python (2018) *Awarded for being in top 2% with 94 percentile from IIT Kharagpur in Python Programming*

EDUCATION

B.Tech in Computer Science And Engineering

Computer Science And Engineering

Dr. B.C. Roy Engineering College, MAKAUT

2016 - 2020

Durgapur, West Bengal, India

Intermediate Examination

Science

Delhi Public School, Bokaro

2014 - 2016

Jharkhand, India

Secondary School Examination

CBSE

Geeta Devi D.A.V. Public School, Deoghar

2014

Jharkhand, India

CAREER OBJECTIVE

Dynamic Senior Software Engineer with a proven track record at Allianz Technology, excelling in full-stack development and automation. Expert in Core Java , I enhanced system architecture and reduced translation efforts by over 90%. Adept at cross-team collaboration, I drive impactful solutions that elevate user experience and operational efficiency.

WORK EXPERIENCE

Senior Software Engineer

Allianz Technology

2022 - current / Pune, India

- **Roles and Responsibilities - ITMP Italy project:**
- **FNOL Portal Enhancements & Upgrades:** Led major and minor version upgrades (v23 to v25.42), resolving navigation flow errors and optimizing functionality.
- **Full-Stack Development:** Adapted to Angular from scratch, contributing to UI improvements, IBAN validation, and claim summary document handling.
- **Automation & Tool Development:** Created the Italy Translation Merging Tool, reducing manual translation efforts from 30-60 minutes to under 2 minutes.
- **Postman API Automation:** Designed and modified CISL Postman collections, supporting Italian testing teams and streamlining service request validations.
- **Cross-Team Collaboration:** Worked with ITMP, BuCom, BFF (Dispatcher), and CISL teams to resolve deployment, localization, and API integration issues.
- **Authentication & API Gateway:** Debugged Matrix portal integration, simulating functionality via Postman collections for seamless FNOL front-end access.
- **RAP & Airwave Applications:** Diagnosed and resolved critical defects in RAP and Airwave workspaces, fixing registry issues and stabilizing core functionalities.
- **Roles and Responsibilities - LeanCore project:**
- **Micro Front-End (MFE) Development & Integration:** Led the POC and implementation of "Circumstances," "Solution," and "Coverage" MFEs, enabling modular, scalable integration within Airwave.
- **MFE-Airwave Communication:** Engineered an event-driven communication framework between MFEs and Airwave, ensuring efficient data exchange and seamless UI interactions.
- **System Architecture Enhancement:** Designed and implemented new chapters and subchapters in Airwave, enhancing the platform's structure for better scalability and maintainability.
- **Full-Stack Development:** Successfully developed, tested, and integrated MFEs, maintaining UI/UX consistency and ensuring robust backend interactions within Airwave.

Software Engineer

Wipro Technology

2020 - 2022 / Bangalore, India

- **Automation and Scripting:** Developed and automated test cases using Python, working within the Rails framework to streamline the testing process for Intel
- **Debugging and Maintenance:** Played a critical role in troubleshooting and debugging automation scripts, isolating bugs, and resolving issues related to execution errors and script performance
- **Web Development :** Contributed to scripting and developing web applications using Java and database systems, ensuring robust interaction between front-end and back-end components.
- **Feature Development for Automation Systems :** Assisted in the development of new features to incorporate real-life test case scenarios, ensuring smooth interaction between test devices and drivers in the automation system.
- **Device and Firmware Testing :** Managed the installation and verification of the Thunderbolt Certification Manager, along with verifying connected C-switch and Arduino Firmware functionality.
- **Collaboration and Reporting :** Worked closely with cross-functional teams to align on testing objectives, providing timely updates and reports regarding test progress and issues.
